

Milton Tulli

Senior Software Engineer — Web3, React & Full-Stack

✉ milton.tulli@gmail.com · 📞 +54 9 223 454333 · [GitHub](#) · [LinkedIn](#)

About

Software Engineer with 12+ years of experience building production systems across fintech, healthcare, eCommerce, and Web3/DeFi. I own products end-to-end — from system architecture and data modeling to APIs, smart contracts, and frontend applications.

Expert in React/Next.js and TypeScript with strong backend skills in Node.js and Go. 5+ years working deeply in Web3: Solidity smart contracts, on-chain indexing, wallet integrations, and decentralized application architecture.

I've built staking systems processing millions in TVL, auction platforms, governance tools used by major protocols, and SEO engines generating 700K+ pages that drove 20% subscription growth. Comfortable leading platform migrations, conducting smart contract security reviews, and establishing engineering standards for teams.

What I bring:

→ End-to-end ownership — from requirements and architecture to production and post-launch support → Track record across JP Morgan, LexisNexis, DXdao, and Tally — leading teams, mentoring engineers, and shipping at scale → Strong focus on clean architecture, testing, developer experience, and performance → AI-augmented development workflows — I use Cursor, Claude Code, and custom agent orchestration to ship faster and with higher quality

Core technologies: React · TypeScript · Next.js · Go · Node.js · Solidity · GraphQL · wagmi · viem · PostgreSQL · Docker · AWS · Google Cloud

Open to remote opportunities — Web3, fintech, or SaaS — where I can build meaningful products and have real ownership.

Experience

Senior Software Engineer · Tally.xyz — Jan 2025 – Present

Remote · Governance, staking, airdrop and token launch products for major DAOs and protocols

- Developed **liquid staking for Obol** (12M+ OBOL staked, \$257K TVL) and **direct staking for zkSync** (199M+ ZK staked, \$3.77M TVL) — full ownership from client requirements to production
- Built the complete **Uniswap CCA auction frontend** on Arbitrum: bidding flow, KYC/idOS verification, SIWE authentication, geo-blocking, and multi-chain support
- Built and shipped **airdrop claim flow for Hyperlane** protocol
- Led **DAO home page redesign** (7+ layout variants), built **internal compliance tool** from scratch (Clerk auth, DB schema, admin UI), and shipped **proposal simulations** (Seatbelt/Hexagate)
- Conducted **security review of Orchestrator smart contracts**, identifying issues across Medium/Low/Informational severity levels
- Drove **5 major platform migrations**: Next.js 13→15, yarn→pnpm, wagmi v2, Turbopack, and React Query v5

- Established **AI-augmented dev workflows** (CodeRabbit, Sentry MCP, Claude commands) and CI/CD improvements with **E2E testing** (Playwright & Synpress)
- Maintained **Go backend** (GraphQL API) with new query filters and contributed to the **custom blockchain indexer**
- Shipped custom features for **7+ protocol clients** (Obol, zkSync, Uniswap, Hyperlane, Rari, BOB, Lisk) — demos, requirements, and post-launch support

Next.js 15 · TypeScript · React · Go · GraphQL · Solidity · wagmi · viem · TanStack Query · Tailwind · shadcn/ui · Tenderly · Playwright · Google Cloud

Sr Software Engineer · DxDao — Dec 2021 – Nov 2024

Remote · dxGov squad — governance infrastructure for decentralized organizations

- Led development of **DAVI** — web3 governance dApp from scratch, deployed on IPFS
- Developed and maintained **Solidity smart contracts** for the DXdao governance system
- Built **subgraph indexers** (The Graph) for on-chain governance data
- Introduced **web3 E2E testing** with Synpress (Cypress + MetaMask automation)
- Full local dev environment: Hardhat, contract deployments, dual subgraphs, Docker
- Participated in **internal security reviews** and audit preparation

React · TypeScript · Solidity · ethers.js · wagmi · SWR · The Graph · Hardhat · Synpress · Docker · IPFS

Sr Software Engineer · Firstleaf — Mar 2021 – Mar 2022

Remote · eCommerce

- Redesigned the main wine store frontend (React/Gatsby.js) with Contentful CMS integration
- Implemented A/B testing infrastructure and performance optimizations

React · TypeScript · Gatsby · Redux · Cypress · Contentful

Sr Software Engineer · LexisNexis (via Making Sense) — Dec 2019 – Dec 2020

Remote

- **React Lead Developer** for CopLogic Ethos — law enforcement reporting platform (US & Canada)
- First React developer in a C#-led project; established best practices, testing standards, recruited & trained devs
- Built early React Native mobile prototype

React · TypeScript · .NET · Redux · GraphQL · PostgreSQL · AWS · React Native

Web UI Engineer · JP Morgan Chase — Jun 2018 – Mar 2019

On-site, Buenos Aires

- Built the **Spread Dashboard** — real-time bond trading app across multiple regions
- **Lead Frontend Developer** for clo-secondary-portfolio (team of 6)

React · Redux · Sagas · Jest · Enzyme · Polymer

Earlier Roles

- **Full Stack Developer** · PeerMedical (HealthTech) — Mar–Aug 2019 — React, Node.js, AWS Lambda, MongoDB

- **Full Stack Developer** · ExploreShare — Sep–Nov 2019 — Short-term contract
 - **Web Developer** · 123Seguro (InsurTech) — 2017–2018 — React, PHP/Laravel, Lead Frontend
 - **Freelance Developer** — 2013–2016 — JavaScript, Node.js, WordPress
 - **Analyst** · Fullive Logistics — 2012–2013 — VBA, C#, SQL
-

Side Projects

 **ALMA** · *Co-founder & Builder* — Free prenatal care tool: dynamic monitoring of fetal growth and well-being. Automated ultrasound analysis, gestational age calculation, Doppler flowmetry, and fetal weight prediction. *Next.js 15* · *Convex* · *Clerk* · *Tailwind*

 **ERC-7730 SDK** — TypeScript library for decoding blockchain transactions into human-readable format.

 **Ephemeral Deploy** · *Creator* — Instant deployment API for AI agents — "Vercel, but for agents." Ship any framework to a live URL with a single POST and a Solana micropayment. *Next.js* · *Vercel API* · *Solana* · *x402* · *Upstash Redis*

 **Launcher PoC** — Token launch interface for Uniswap V4 with Tenderly simulation.

Education

 **B.S. Computer Science** — 21st Century University, Buenos Aires  **B.A. Musical Arts** — National University of Arts, Buenos Aires (*Professional Pianist*)

Technical Skills

- **Frontend:** React, Next.js (13–16), TypeScript, Tailwind CSS, shadcn/ui, TanStack Query, Redux, Gatsby, Astro
 - **Web3:** Solidity, wagmi, viem, ethers.js, Hardhat, Foundry, The Graph, IPFS, ERC-20/721/7730, OpenZeppelin
 - **Backend:** Node.js, Express, NestJS, Go, Python, GraphQL, REST
 - **Databases:** PostgreSQL, MongoDB, MySQL, Convex, DynamoDB
 - **Cloud/DevOps:** AWS (Lambda, S3, EC2, CloudFront), Google Cloud, Docker, CI/CD, Vercel
 - **Testing:** Cypress, Jest, Synpress, Playwright, Mocha/Chai
 - **Performance:** Profiling, memory leak analysis, React Query optimization, bundle analysis
 - **AI Workflow:** Cursor, Claude Code, Conductor, OpenClaw, ChatGPT/Codex
-

Languages

-  **Spanish** — Native
-  **English** — Professional working proficiency
