About

Senior Software Engineer with 12+ years of experience building production applications across fintech, healthcare, eCommerce, and Web3/DeFi. Expert in React/Next.js and TypeScript with strong backend skills in Node.js and Go. 5+ years in Web3 with hands-on Solidity and smart contract experience. Shipped end-to-end features — from smart contract development and deployment to frontend interfaces — for governance platforms, staking systems, token auctions, and airdrop claim flows used by protocols like Uniswap, Obol, zkSync, and Hyperlane. Built staking products handling 12M+ OBOL (\$257K TVL) and 199M+ ZK (\$3.77M TVL) in total value staked. Track record of leading teams, working directly with protocol clients, and owning full product verticals from requirements to production.

Experience

Software Engineer · [Tally.xyz](#) Jan 2025 — Mar 2026

Remote · Governance, staking, and token launch products for major DAOs and protocols

- Developed **liquid staking** for [Obol](#) (12M+ OBOL staked, \$257K TVL) and **direct staking** for [zkSync](#) (199M+ ZK staked, \$3.77M TVL) — full ownership from client requirements to production
- Built and shipped **airdrop claim flow** for [Hyperlane](#) protocol
- Built and deployed **smart contracts for the IDOS auction** using Uniswap CCA contracts on Arbitrum
- Worked **directly with protocol clients** — demos, technical requirements, post-launch support
- Integrated multiple **external service providers** across payment, wallet, and blockchain infrastructure
- Drove **performance improvements** across products and improved test coverage
- Maintained **Go backend** (GraphQL API) and contributed to the **custom blockchain indexer**
- Configured **CI/CD**, Vercel deployments, Google Cloud, **E2E testing** with Playwright & Synpress

Next.js 15 · TypeScript · React · Go · GraphQL · Solidity · wagmi · viem · TanStack Query · Tailwind · shadcn/ui · Tenderly · Playwright · Google Cloud

Sr Software Engineer · [DxDao](#) Dec 2021 — Nov 2024

Remote · dxGov squad — governance infrastructure for decentralized organizations

- Led development of **DAVI** — web3 governance dApp from scratch, deployed on IPFS
- Developed and maintained **Solidity smart contracts** for the DXdao governance system — [open source](#)
- Built **subgraph indexers** (The Graph) for on-chain governance data
- Introduced **web3 E2E testing** with Synpress (Cypress + MetaMask automation)
- Full local dev environment: Hardhat, contract deployments, dual subgraphs, Docker
- Participated in **internal security reviews** and audit preparation

React · TypeScript · Solidity · ethers.js · wagmi · SWR · The Graph · Hardhat · Synpress · Docker · IPFS

Sr Software Engineer · [Firstleaf](#) Mar 2021 — Mar 2022

Remote · eCommerce

- Redesigned the main wine store frontend (React/Gatsby.js) with Contentful CMS integration
- Implemented A/B testing infrastructure and performance optimizations

React · TypeScript · Gatsby · Redux · Cypress · Contentful

Sr Software Engineer · LexisNexis (via Making Sense) Dec 2019 — Dec 2020

Remote

- **React Lead Developer** for CopLogic Ethos — law enforcement reporting platform (US & Canada)
- First React developer in a C#-led project; established best practices, testing standards, recruited & trained devs
- Built early React Native mobile prototype

React · TypeScript · .NET · Redux · GraphQL · PostgreSQL · AWS · React Native

Web UI Engineer · JP Morgan Chase Jun 2018 – Mar 2019

On-site, Buenos Aires

- Built the **Spread Dashboard** — real-time bond trading app across multiple regions
- **Lead Frontend Developer** for clo-secondary-portfolio (team of 6)

React · Redux · Sagas · Jest · Enzyme · Polymer

Earlier Roles

Period	Role	Company	Tech
Mar–Aug 2019	Full Stack Developer	PeerMedical (<i>HealthTech</i>)	React, Node.js, AWS Lambda, MongoDB
Sep–Nov 2019	Full Stack Developer	ExploreShare	Short-term contract
2017–2018	Web Developer	123Seguro (<i>InsurTech</i>)	React, PHP/Laravel, Lead Frontend
2013–2016	Freelance Developer	—	JavaScript, Node.js, WordPress
2012–2013	Analyst	Fullive Logistics	VBA, C#, SQL

Side Projects

 [ALMA](#) · Co-founder & Builder

Free prenatal care tool: dynamic monitoring of fetal growth and well-being. Automated ultrasound analysis, gestational age calculation, Doppler flowmetry, and fetal weight prediction — reducing fetal mortality and improving prenatal risk control.

Next.js 15 · Convex · Clerk · Tailwind

 [ERC-7730 SDK](#) · [npm](#)

TypeScript library for decoding blockchain transactions into human-readable format.

 [Launcher PoC](#)

Token launch interface for Uniswap V4 with Tenderly simulation.

Education

 **B.S. Computer Science** — 21st Century University, Buenos Aires

 **B.A. Musical Arts** — National University of Arts, Buenos Aires (*Professional Pianist*)

Technical Skills

Area	Technologies
Frontend	React, Next.js (13–16), TypeScript, Tailwind CSS, shadcn/ui, TanStack Query, Redux, Gatsby, Astro
Web3	Solidity, wagmi, viem, ethers.js, Hardhat, Foundry, The Graph, IPFS, ERC-20/721/7730, OpenZeppelin
Backend	Node.js, Express, NestJS, Go, Python, GraphQL, REST
Databases	PostgreSQL, MongoDB, MySQL, Convex, DynamoDB
Cloud/DevOps	AWS (Lambda, S3, EC2, CloudFront), Google Cloud, Docker, CI/CD, Vercel

Testing	Cypress, Jest, Synpress, Playwright, Mocha/Chai
Performance	Profiling, memory leak analysis, React Query optimization, bundle analysis

Languages

- 🇪🇸 Spanish — Native
- 🇬🇧 English — Professional working proficiency
